INTRODUCTION

Gold production today is a very profitable business. This product is highly liquid and always increases in price. The profitability of gold production is very high, but the organization of the production process and the legality of income in emerging economies is very poor.

In the world, with the growth of probability and cryptocurrencies, new opportunities for large earnings of people are invested in small amounts of money.

2. GOLD MAX TOKEN. GENERAL

Gold Max Token is a token whose owner can **buy physical gold** from gold producers at a **1-10% discount**.

Our team has contacts with gold producers who are ready to sell their gold at a discount, so as not to get involved with wholesale buyers and their requirements, such as 'Trafigura', 'Glencore' and other corporations.

Problems with production and increase in production volumes are associated with high costs. That is why we are helping to attract investment in production now, in order to produce gold and let investors earn money.

3. BASIC TECHNICAL DATA

Each individual Gold Max token represents 1 ounce of gold.

1 token Gold Max	1 ounce of gold
------------------	-----------------

Issue: 100,000 (one hundred thousand) tokens

Decimal places: 4 (0.0001)

Tokenomics:

5% Airdrop

85% Public Sale

10% Management

Protocol: ERC-20 (later BEP-20)

4. BASIC FUNCTIONALITY

4.1. General about gold holder

The owner of the token can redeem gold at a discount of 1-10%, depending on the amount of gold. The larger the amount, the higher the discount.

Physical gold is stored in a bank (Central America). The client receives all the details after the conclusion of the contract on the confidentiality of the transaction.

4.2. Purchase process of the physical gold

- 1. The buyer applies through our team and makes an application for the purchase of the required amount of gold.*
- 2. Our team contacts the manufacturer and places an order for the required amount of gold.*
- 3. A contract is signed by the buyer-seller for the purchase of gold at a discount. The discount percentage is specified in the contract.*
- 4. The guarantor of the transaction is a third party (bank).*
- 5. The buyer sends tokens to the wallet of our team.*
- 6. The seller of gold gives a payment order to transfer physical gold after receiving payment in his account to the buyer.*
- 7. The buyer takes the physical gold purchased at a discount from the bank.*
- 8. Tokens are re-listed for sale.*

4.3. The minimum requirements of tokens to buy physical gold.

- The client must have a minimum of **50 tokens** in order to purchase physical gold.
- Checking the KYC of the buyer.

5. OUR TEAM

We are a group of entrepreneurs and work with gold miners.

Our main task in working with gold miners is to develop business and increase production capacity.
